BE COUNTED COUNTED UPON

Every person matters. Every part makes a difference. In the family of Ariens employees, craftsmanship still means something. Together we build mowers that deliver world-class performance. Day after day. Season after season.

A RIGOROUS PRODUCT DEVELOPMENT PROCESS IS AT THE HEART OF ARIENS' INNOVATION.

Great ideas come from almost anywhere, but sometimes the best ideas come from users. So we ask questions, and more importantly, listen. We meet with Ariens owners around the world, learn from them, and bring home new ideas. With these new concepts, engineers refine and optimise through a gruelling, multi-phased testing process. With patience, persistence and hard work, the very best ideas end up painted orange as the next mower in your garage.

ZERO-TURNS

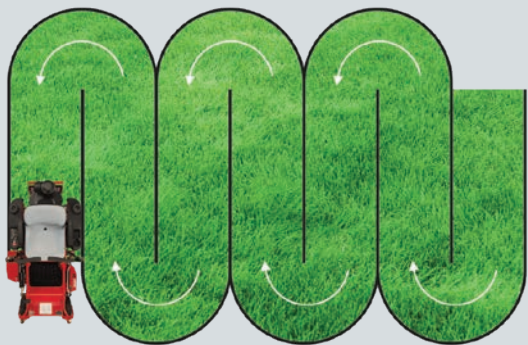

THE FASTER WAY TO MOW LARGER LAWNS

RECLAIM YOUR WEEKEND WITH THE ARIENS ZERO-TURN RANGE. 'TURN-ON-A-SIXPENCE' AND MOW YOUR LAWN IN HALF THE TIME OF A CONVENTIONAL LAWN TRACTOR.

In recent years, zero-turn ride-on lawnmowers have grown in popularity both here in Europe and throughout the USA. The reason is simple. People are working harder and longer hours than ever before. Come the weekend, few want to spend the whole of their precious day-off mowing the lawn. An Ariens zero-turn will complete the work in no time at all.

What makes these zero-turns so fast? Rather than the conventional steering system found on a lawn tractor or out-front mower, these zero-turns are driven and steered by the rear wheels via an independent transmission. Two handles are all you need to drive, brake and steer them. This system enables you to spin on the spot. Imagine – no three-point-turn at the end of the cutting pass.

After just a few minutes of practice, the controls feel second nature. You can easily and precisely cut around obstacles such as flower beds, trees or garden ornaments.

A zero-turn mower will allow you to cut your lawn efficiently as you can turn 180° at the end of a mowing row. There is no need to drive over previously cut areas or waste time backing up to manoeuvre into position for the next pass

EASY STEERING LEVERS

Forward: Push the handles forward

Reverse: Pull the handles back

Right Turn: Push the left handle forward

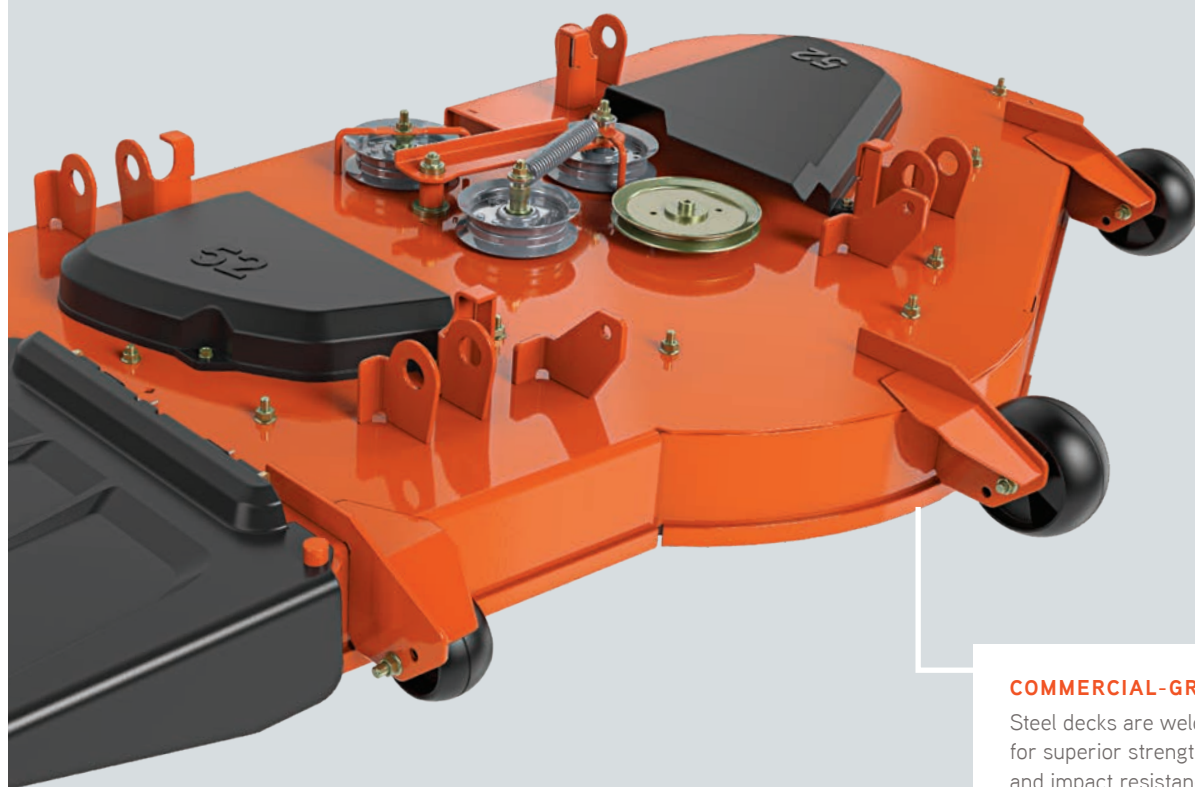

Left Turn: Push the right handle forward

Stop: Bring the handles back to centre

RAISING THE STANDARD

Ariens zero-turn mowers are designed, tested and built to provide the toughest, most comfortable ride with the highest quality cut possible. And, with faster speeds and superior manoeuvrability than lawn tractors, Ariens mowers will cut your mowing time in half.

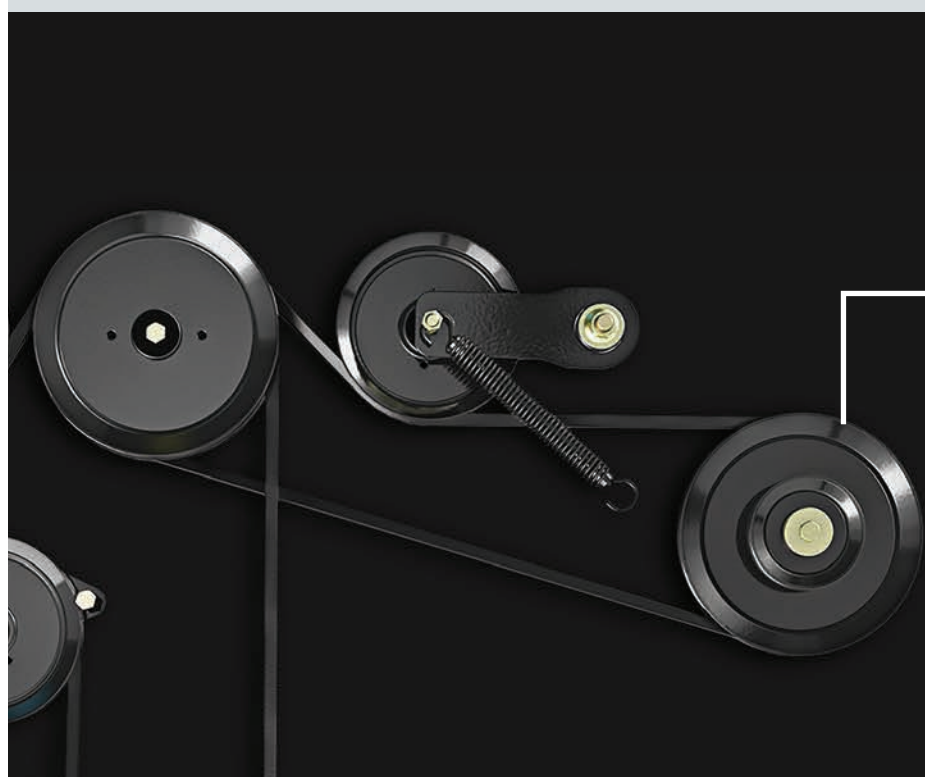

COMMERCIAL-GRADE DECK

Steel decks are welded together for superior strength, durability and impact resistance.

COMFORTABLE SEATS

Options like the plush, adjustable high-back seat with padded armrests allows for longer use and greater comfort.

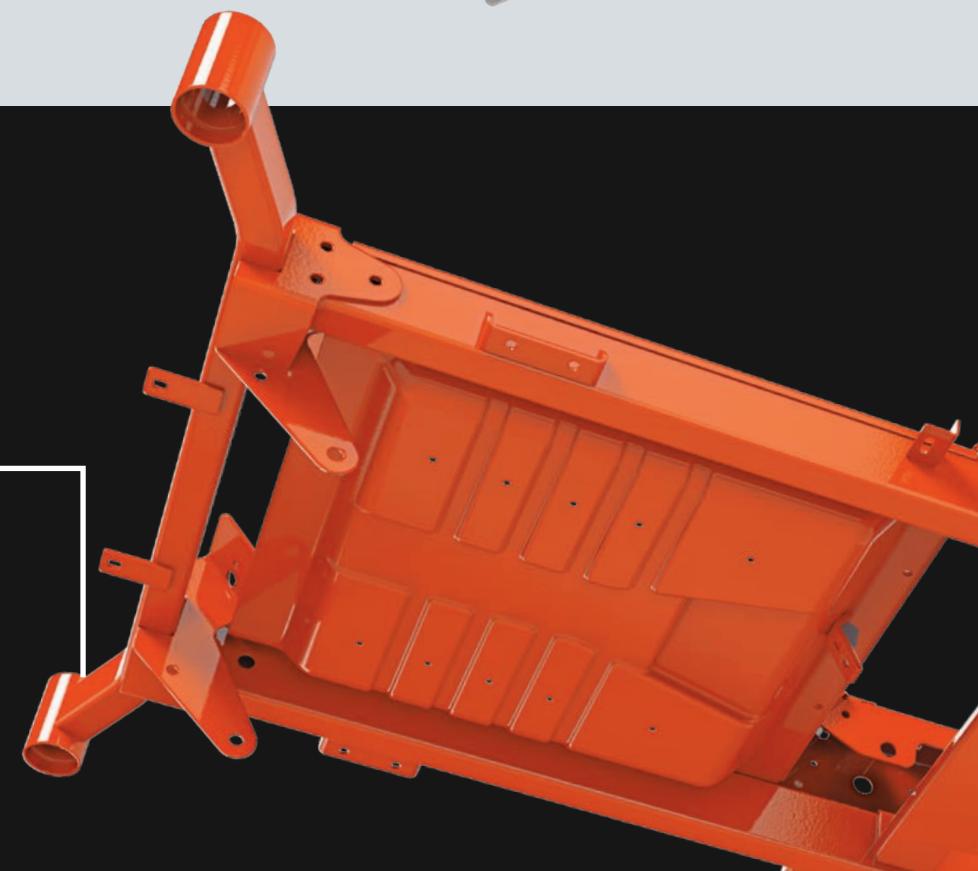

BELT TENSION TECHNOLOGY

The self-adjusting belt keeps the tension constant, to maximise belt life, minimise wear and maintain a consistent, quality cut.

TOUGH-AS-NAILS FRAMES

Steel frame rails are strong and more resistant to stresses, supporting loads of the machine with unprecedented strength and stability.

BATTERY POWER **LITHIUM-ION**

ZERO EMISSIONS. LOW NOISE. FULL COMMERCIAL PERFORMANCE.

THE ZENITH E IS A FULLY COMMERCIAL-GRADE BATTERY-POWERED ZERO-TURN SPECIFICALLY DESIGNED FOR THE PROFESSIONAL USER. IT CAN BE USED FOR A FULL WORKING DAY BETWEEN CHARGES AND OPERATES WITH NO EMISSIONS AND QUIET OPERATION.

For the commercial landscaper, working in urban, populated areas brings specific demands that can be difficult to overcome with conventional power equipment. A customer's sensitivity towards excessive noise and carbon emissions may place restrictions on the use of petrol or diesel engine mowers around schools, offices, hospitals and some inner-city parks.

The Zenith E is the first, fully-commercial battery powered zero-turn that overcomes these issues without compromising on performance or productivity. Based upon the best-selling Zenith platform, the Zenith E delivers the same outstanding features but with advanced, proprietary technology which makes it the new industry leader in battery-powered zero-turns.

POWERED BY
FUSIONCORE

INTELLIGENT LOAD BALANCING

Four interchangeable batteries allow for up to five and half hours of continuous cutting. The battery management system provides intelligent load balancing. This means that power is drawn from fully-charged batteries first, before then drawing from all four batteries equally. Each battery is rated for >1000 charge cycle life.

ZENITH E

BLADE SLIP FEATURE

Ariens patent-pending spindle design can absorb impact with little risk of serious damage. A unique blade slip feature allows the blade to slip momentarily should it hit an unmovable object, protecting the 3.5kW spindle motor. The spindle has a replaceable bottom bearing allowing for servicing and maintenance without the need to replace the whole unit.

ZENITH E SERIES

POWERED BY
FUSIONCORE

BATTERY BENEFITS, PETROL PERFORMANCE

Ariens zero-turn mowers thrive in the toughest commercial environments and the Zenith E is no exception. Fusing next generation battery technology into the rugged frame of a commercial-grade Ariens Zenith provides landscapers a powerful new choice to lower costs, increased profitability and access to emerging contracts for low-noise, zero emission contracts.

ZENITH E

MODEL OVERVIEW

DESIGNATION	ZENITH E (Side Discharge)	ZENITH E (Rear Discharge)
MODEL	99730100	99730200
BATTERY TYPE	Lithium Ion	Lithium Ion
CUTTING WIDTH	152 cm (60")	152 cm (60")
GROUND SPEED (FWD/REV)	17.7 kph / 8.9 kph (11 mph / 5.5 mph)	17.7 kph / 8.9 kph (11 mph / 5.5 mph)
BATTERY LIFE	1,000 charge cycles	1,000 charge cycles

POWERED BY FUSIONCORE

4x interchangeable Lithium Ion, sealed for life 56v batteries with 4kWh capacity – will drive on just one pack, and cut on two

PROPRIETARY ELECTRIC TRANSAXLES

Provides the same feel as a petrol commercial ZT. Brushless electric drive motor coupled with dual reduction planetary gearbox

INTELLIGENT LOAD BALANCING

Battery management system will draw power from fully charged batteries first, then draw equally from all four units

ONBOARD CHARGING

Charge batteries whilst in the Zenith E. Comes with a standard 12 hour smart charger. Options include a 5.3 hour onboard speed charger and two offboard chargers (12 or 5.3 hour)

SPINDLE PROTECTION

Patent-pending spindle is designed to absorb massive impact. Spindle is protected should the blade impact an immovable object

BLADE SLIP FEATURE

Prevents damage to the motor by limiting the impulse torque transferred to the spindle shaft should the blade strike the ground or a solid object

EDGE[®] SERIES

STEP UP YOUR MOWING GAME.

Experience the comfort, convenience and versatility of a zero-turn mower backed by the quality and performance you expect from an Ariens. The Edge's intuitive controls help you manoeuvre in, around and through smaller gardens with a fast, clean cut. Get your perfectly-manicured lawn and get back to your busy day faster with Ariens' legendary zero-turn engineering in your garage.

MODEL OVERVIEW

DESIGNATION	EDGE [®] 42	EDGE [®] 34
MODEL	915253	915252
ENGINE	Ariens 635 cc	Ariens 635 cc
CUTTING WIDTH	107 cm (42")	86 cm (34")
GROUND SPEED (FWD/REV)	9.6 kph (6 mph) / 4.8 kph (3 mph)	9.6 kph (6 mph) / 4.8 kph (3 mph)
FUEL CAPACITY	7.5 litres	7.5 litres

MOWER DECK

Choose from a 107cm (34") stamped deck or a 107cm (42") fabricated deck.

DECK SYSTEM

A four-point deck lift system offers unmatched stability and consistent cutting.

COMFORT

The high back seat with natural airflow enhances operator comfort while keeping you cool.

INTUITIVE CONTROL

The foot-operated deck lift offers quick and easy cutting height adjustment.

IKON XD SERIES

THE IKON XD IS PACKED WITH COMMERCIAL QUALITY FEATURES.

It features a fully welded, heavy-duty tubular steel frame providing enhanced strength and stability whilst travelling over different terrains. The 10-gauge, fabricated deck is both durable and capable of excellent cut quality.

Both models come with a dial-operated deck height selector. Depress the deck height foot pedal and, with a quick turn of the intuitively positioned dial, you can select from one of 13 cutting heights.

Operator comfort is enhanced by a professional-style plush high back seat with armrests and padded control arms.

Being a zero-turn, the IKON XD mows twice as fast as a typical ride-on. At the end of each pass, it can turn 180° in its own footprint, ready for cutting the next row.

While both models come fitted with side-discharge decks, an optional conversion kit transforms the IKON XD into a high performance mulcher.

COMMERCIAL-STYLE DECK

10.2 cm (4") deep fully fabricated with advanced airflow for an exceptional cutting performance.

TUBULAR STEEL FRAME

The fully-welded steel frame provides strength and durability.

DIAL-OPERATED CUTTING HEIGHT

13 cutting positions at your fingertips allows for easy adjustments from 3.8 cm to 11.4 cm (1½" to 4½") cutting height with the turn of a dial.

HYDROSTATIC EZT TRANSAXLE

Transaxles provide increased torque and a smooth operation for better control .

PLUSH SEAT

Options like the plush, adjustable highback seat with padded armrests allows for longer use and greater comfort.

APEX SERIES

ROPS
Frame supports an optional folding ROPS for added operator protection

Powered by
Kawasaki

THE APEX REPRESENTS THE VERY PINNACLE OF ZERO-TURN PERFORMANCE.

It is a commercial-grade zero-turn mower that has been designed to be used all day, every day.

When it comes to precision, comfort and durability, the APEX outperforms just about anything else in its class. Ariens understand that the most important aspect affecting a machine's productivity is the person using it. So from the ground-up, this zero-turn is designed around the operator. Driving the APEX feels second nature. Innovative features such as progressive steering and a plush, padded high-back seat with armrests make it comfortable for day-long use.

The APEX boasts a 14cm (5½") deep fabricated deck made of 10-gauge steel available in either a 122cm (48") or 132cm (52") configuration. The fully tubular steel frame delivers unprecedented strength, just where it's needed most.

FUEL CAPACITY	18.9 litres	18.9 litres

10-GAUGE WELDED DECK

Fully fabricated 13.9 cm (5 ½") deck offers superior airflow and exceptional cutting performance.

SOLID FRAME

Industry-leading, fully-welded tubular frame supports the overall design.

ROPS CAPABLE DESIGN

Frame supports a folding ROPS option for added protection to the operator.

DECK LIFT SYSTEM

Foot-operated spring-assisted lift lets you effortlessly adjust between 15 cutting positions.

SELF ADJUSTING BELT DRIVE

Minimises wear and tear with little to no maintenance required.

LARGE TYRES

55.9 cm (22") rear and 33 cm (13") front tyres provide solid traction and a comfortable ride.

COMFORT FEATURES

High-back plush seats with padded arm rests provide all-day comfort.

ZENITH SERIES

Powered by
Kawasaki

THE ZENITH IS THE PROFESSIONAL’S CHOICE.

Designed with the professional in mind, the Zenith boasts a large 152cm (60") cutter deck and faster ground speed to improve productivity.

Its ultra-comfortable, ergonomically-designed padded seat not only reduces user fatigue, it also helps to absorb the impact on uneven surfaces.

The tubular steel frame supports folding ROPS for added protection and peace-of-mind, allowing the operator to concentrate on delivering results first time every time.

Large formed tubular frame rails serve as the backbone to support the loads of the machine

LARGE TYRES

Category-leading tyres provide superior traction and ride quality

CONSTANT BELT TENSION (CBT) SYSTEM

Ensures the belt tension is constant, minimising wear and heat while providing enhanced belt life with minimal adjustments necessary

FOOT-OPERATED DECK LIFT SYSTEM

Provides effortless adjustments between 15 cutting positions in 6.35mm (¼") increments with a vertical pin selection

HIGH-BACK SEAT

Featuring additional padding, the high-back seat features armrests and integrated seat isolators

ROPS

Frame supports folding ROPS for added protection to the operator

GARDEN TRACTORS FOR YEAR-ROUND USE

DESIGNED AND BUILT SPECIFICALLY FOR EUROPEAN CUTTING CONDITIONS, ARIENS GARDEN TRACTORS UTILISE UNIQUE CUTTING AND COLLECTION TECHNOLOGY TO PROVIDE THE VERY BEST FINISH ON LAWNS, PADDOCKS AND ORCHARDS.

Each Ariens tractor is fitted with a power take-off*, a rear-mounted drive system which allows it to power a series of attachments such as the PGC+ cassette system, scarifier or broadcast spreader.

Unlike almost any other machine on the market, Ariens tractors have an independent powered grass collection system which sweeps the grass clippings from the lawn. An Ariens tractor will not clog even when cutting in damp or wet conditions.

Most Ariens tractors can be fitted with an optional High Grass Mulch deck**. This heavy-duty accessory is capable of cutting tall grass, nettles and brambles or even a fine lawn.

In addition to the C and A Series 2WD tractors, the Ariens B Series features 4TRAC four-wheel drive – providing all-terrain capability on slopes and in difficult, slippery conditions.

* Depending on model ** See page 47 for compatibility

PGC+ CASSETTE SYSTEM

PGC+

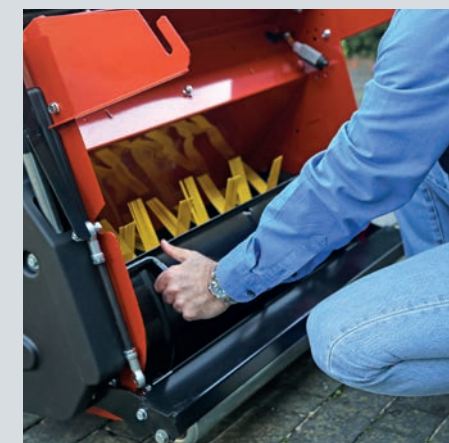

A MULTI-USE TRACTOR

THE WORLD'S MOST EFFECTIVE GRASS COLLECTION SYSTEM JUST GOT EVEN BETTER

The PGC+ is much more than just a grass collector. A range of interchangeable cassettes transform your C or B Series tractor into a multi-use, year-round workhorse*.

Maintaining the garden and grounds is now much easier. The Grass Sweeper cassette comes as standard with the PGC+. A Scarifier and Hard Surface Brush** are also available.

The cassettes are designed to save you both time and money. There's no need to unhitch the grass collector from the tractor and re-attach a different accessory. Simply remove the collection net, take out the current cassette and load the next one. This new cassette system is also cost-effective as there's no need to purchase standalone equipment.

NEAR PERFECT CUTTING AND COLLECTION

ARIENS TRACTORS UTILISE A UNIQUE CUTTING AND COLLECTION SYSTEM, ENSURING THAT GRASS IS CUT AND COLLECTED FULLY EACH AND EVERY TIME YOU MOW*.

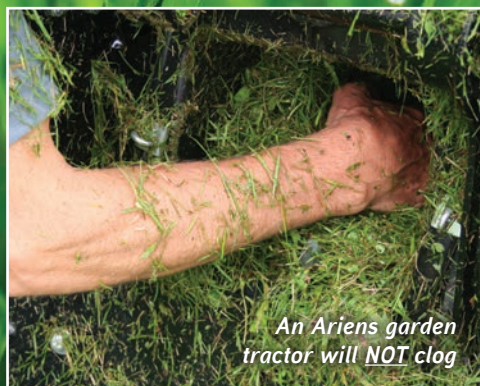

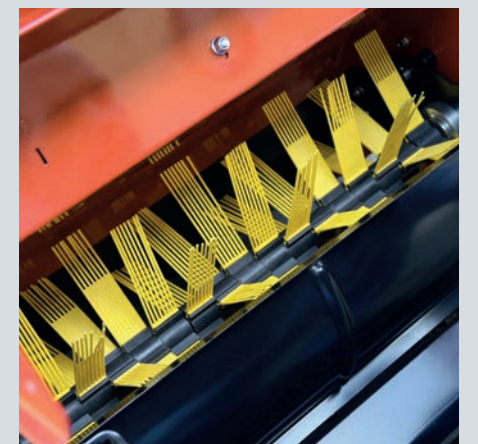

Even if the lawn is wet, an Ariens tractor will continue to perform completing the job without clogging.

Most ride-on lawnmowers rely on the airflow caused by the cutting blades to throw lawn clippings into the grass catcher. This system can be noisy and inefficient. Damp grass will often get clogged in the deck and discharge chute. The Ariens system works in a different way.

C and B Series tractors are fitted with an XRD deck*. Here, three contra-rotating blades cut the grass, throwing the clippings to the rear of the cutter. High-speed rotating brushes mounted inside the grass collector sweep up the cuttings into a large 300 litre hopper (390 litre for the A Series).

The grass collector features an integrated lawn roller. An Ariens tractor leaves a perfect striped lawn finish each and every time you mow your lawn*.

* C40M is fitted with a High Grass Mulching deck and cannot be configured with other decks or the PGC+

An Ariens garden tractor will NOT clog

The XRD deck's contra-rotating blades discharge the grass clippings to the rear of the deck

A THICKER, LUSHER LAWN

IN ORDER TO ENSURE A LAWN LOOKS GREAT AND IS ALSO HEALTHY AND DISEASE-FREE, IT NEEDS TO BE SCARIFIED TO RID IT OF THATCH AND MOSS.

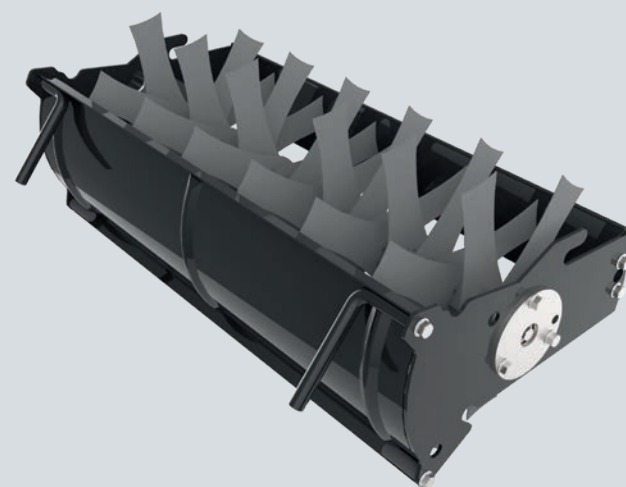

Scarifying removes surface thatch which enables oxygen, light and nutrients to penetrate the grass roots, encouraging thicker, lush growth. Westwood's optional Scarifier cassette, part of the PGC+ cassette system*, makes light work of this laborious process.

Twenty-four individual tines rip through the thatch and moss at high-speed, removing material from the bed of the lawn and into the hopper. Simply insert the scarifier cassette into the PGC+ and start scarifying.

Another benefit of the Scarifier cassette is there is no need to buy a separate walk-behind scarifier and collection system. The PGC+ does them both simultaneously, saving time and money. Simply empty as you would grass clippings.

A powered scarifier is available for the A Series tractor, driven by the tractor's power take-off. Use the Powered Grass Collector to sweep up the unwanted thatch and empty as you would cut grass.

*Available for C & B Series tractors only (except C40M)

BRUSHING HARD WORK ASIDE

HAVING SPENT TIME AND EFFORT ACHIEVING THE PERFECT LOOKING LAWN, DIRTY DRIVEWAYS, PATHS AND PATIOS CAN BE OVERLOOKED, THUS SPOILING THE OVERALL LOOK OF YOUR GROUNDS.

Sweeping these areas manually is often hard work, time consuming and can leave debris behind. With the Hard Surface Brush cassette* inserted into the PGC+, these jobs become both quick and easy.

Your C or B Series tractor** instantly becomes a heavy-duty powered broom. This easy-to-use attachment helps you to maintain all areas of your grounds throughout the year***.

The heavy-duty bristles rotate at speed, removing material including large piles of leaves, dirt and dust from hard surface areas that a manual broom may not fully remove. Debris is swept into the PGC+ net, so separate collection is not required.

* Hard Surface Brush cassette coming soon

** Not available on C40M

*** Area should be checked for accessibility with the tractor

MAKE SHORT WORK OF TALL GRASS, NETTLES AND BRAMBLES

WHEN THE GOING GETS REALLY TOUGH, THE ARIENS HIGH GRASS MULCH (HGM) DECK IS THE PERFECT ANSWER FOR CLEARING TALL GRASS, BRAMBLES OR NETTLES FROM ORCHARDS AND PADDOCKS.

Using the same principles as an agricultural mulcher, the HGM deck is capable of cutting thick, long grass, brambles, thistles and scrub.

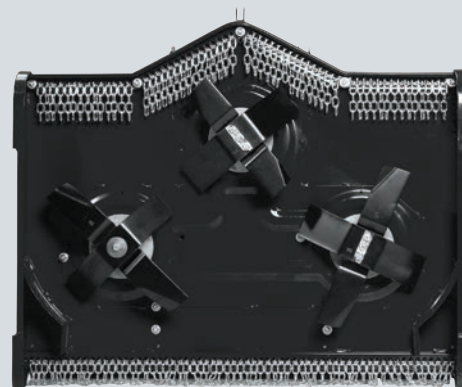

Chains located at the front and rear prevent the grass from being completely flattened and stop it escaping before being cut. Six hardened steel mulching blades cut multiple times, the resulting mulch left on the ground to decompose.

The deck is equally at home cutting shorter grass on a lawn as it is in the paddock.

Sizes available are 92cm (36") or 107cm (42"). See page 47 for tractor compatibility.

Chains located at the front and rear of the deck prevent the grass from being flattened and stop it escaping before being cut

C SERIES

BUILT TO GRADE-ONE SPECIFICATIONS AND PACKED WITH FEATURES.

The core benefits of cutting and collecting in the wet, striping a lawn and the use of a machine 12 months of the year make the C Series the tractor of choice for thousands of customers.

Like all Ariens garden tractors, a C Series is built to a much higher specification than most ‘ride-on lawnmowers’. It’s extra-tough. With a heavy-duty steel chassis, cast front axle and reinforced cutter deck, a C Series is designed to handle the rigours of hard work – day in, day out.

The push-button controlled power take-off drives a range of accessories, including the broadcast spreader and PGC+, extending the use of the tractor*. For added convenience and versatility, the optional PGC+ cassette system has a range of interchangeable cassettes, including a Grass Sweeper (fitted as standard), a Scarifier and Hard Surface Brush cassette**.

B SERIES 4WD

Powered by
Kawasaki

THE UNIQUE 4TRAC SYSTEM TURNS AN ARIENS INTO A ‘GO ANYWHERE, MOW ANYWHERE’ GARDEN TRACTOR CAPABLE OF TACKLING SLOPES, MUD AND ROUGH TERRAIN.

Four-wheel drive extends the tractor’s utility even further. With a B Series you can take your Ariens to places where most ‘ride-on mowers’ can’t go. Safely mow slopes that previously required a brushcutter to clear. Tow a trailer through a muddy copse or clear the snow from your drive.

4TRAC provides ‘on demand’ four-wheel drive. It senses where grip is required and applies drive accordingly. Dynamic Traction Control avoids scuffing on your lawn by varying the speeds of the front wheels when turning.

MODEL OVERVIEW

DESIGNATION	B65-4WD	B255-4WD
MODEL	A1100142	A1100145
ENGINE	FS481V Kawasaki® twin cylinder 603cc	FR730V Kawasaki® twin cylinder 726cc

DYNAMIC TRACTION CONTROL

Avoids scuffing by varying the speeds of the front wheels as the tractor turns.

4TRAC TRANSMISSION

Senses the level of grip required at each wheel and applies drive accordingly.

ACCESS

Getting on and off the tractor is made easy with a shaped steering wheel and adjustable seat position.

POWER TAKE-OFF

Drive a range of accessories for year-round garden care by using the push-button controlled power take-off.

PGC+

Optional interchangeable cassette system includes Grass Sweeper (as standard), Scarifier and Hard Surface Brush* cassettes.

OMS

A simple-to-use dashboard display – everything you need to know about your tractor in one location.

PARK BRAKE

The tractor cannot be started unless the brake is engaged. This important safety device is fitted as standard on all Ariens models.

* Hard Surface Brush cassette coming soon

A SERIES

Powered by
Kawasaki

SUITABLE FOR GROUNDS OF AROUND THREE ACRES OR MORE, A SERIES GARDEN TRACTORS WILL MAKE SHORT WORK OF MOWING LARGE LAWNS, PADDOCKS AND ORCHARDS.

The A25-50HE is Ariens’ largest garden tractor and comes with a powerful 726cc Kawasaki® engine.

It features an optional 390 litre grass collector. This is lifted and emptied via push button control. Its larger capacity means fewer trips to empty cuttings. With 58cm rear wheels and a differential lock, the A Series is comfortable to operate on inclines and won’t mark your turf.

A Series tractors are fitted with a 127cm (50") IBS rear discharge deck (for cutting with collection).

MODEL OVERVIEW

DESIGNATION	A25-50HE
MODEL	A2100008
ENGINE	FR730V Kawasaki® twin cylinder 726cc
CUTTER DECK	127cm (50") IBS rear discharge
POWER TAKE-OFF	Standard
FUEL CAPACITY	7 litres

ELECTRIC LIFT AND EMPTYING

of the optional 390 litre Powered Grass Collector minimises time and effort.

DIFFERENTIAL LOCK

Diff Lock is a standard feature on the A Series and prevents wheel spin.

POWER TAKE-OFF

Drive a range of accessories for year-round garden care by using the power take-off.

POWERED GRASS COLLECTOR

Cut and collect grass fully even when it’s wet while leaving neat lawn stripes (390 litre optional attachment).

OMS

A simple-to-use dashboard display – everything you need to know about your tractor in one location.

PARK BRAKE

The tractor cannot be started unless the brake is engaged. This important safety device is fitted as standard on all Ariens models.

ACCESSORIES

GARDEN TRACTORS

AN ARIENS FOR YEAR-ROUND CHORES.

Ariens garden tractors are designed for year round garden care not just for cutting, striping or mulching a lawn. A range of unique attachments are available for the many tasks around the garden.

POWERED SCARIFIER (A SERIES ONLY)

Powered directly by the engine, the offset scarifier fits in place of the grass collector. Its rotating tines remove thatch and moss allowing the grass plant to recover so improving the overall condition of the lawn. The working height of the scarifier is fully adjustable and, with a 76cm (30") operating width, a lawn can be fully scarified as quickly as it would be mowed. The Powered Grass Collector can be used to sweep up waste material.

- 1 PGC+ (C & B SERIES ONLY)*** Transform your tractor into a multi-use workhorse by fitting the optional PGC+. Driven by the tractor's PTO, this system features a range of easy-to-fit interchangeable cassettes. Cassettes include a Grass Sweeper, fitted as standard, a Scarifier and Hard Surface Brush**. See pages 22-23 to read more about the benefits of owning a PGC+
- 2 POWERED GRASS COLLECTOR (A SERIES ONLY)** Even for those wanting to cut without collecting, the grass collector is a useful option. It's the quickest and most efficient way to collect leaves and garden debris and is invaluable for clearing up after scarifying. Brushing also stimulates turf, helping to prevent the formation of thatch, while the integrated roller leaves neat stripes
- 3 POWERED BROADCAST SPREADER*** Powered by the tractor's engine, the spreader has a hopper that holds up to 50kg of granular material. It can be used for quickly spreading salt on icy paths and tracks. Features an adjustable flow rate
- 4 HIGH GRASS MULCH DECK** Using the same principles as an agricultural mulcher, this deck is capable of cutting thick long grass, brambles, thistles and scrub. Six hardened steel mulching blades cut multiple times, with the resulting mulch left on the ground to decompose

- 5 TRANSPORTATION BOX (C & B SERIES ONLY)** The 120 litre transportation box is ideal for carrying logs, compost and tools. It can be used to transport loads of up to 120kg. Strong and durable, the box is made from heavy duty steel. Both the back panel and corner joints have been reinforced for extra strength. The back panel folds down for easier loading and unloading
- 6 SNOWBLADE** Fitted with a front-mounted snowblade and high-grip chevron tyres, an Ariens garden tractor becomes a formidable force in quickly clearing snow from paths and driveways. The tough rubber-tipped edge of the steel snowblade has been specifically designed to clear snow without damaging a concrete or tarmac surface
- 7 CHEVRON TYRES** Chevron tyres provide extra grip on slippery ground and muddy conditions
- 8 BALL HITCH** Automotive type ball hitch can be fitted to the tow bar. Tow trailers and other attachments with your Ariens
- 9 TRACTOR COVER** A purpose designed cover for protecting your tractor when not in use (Please note: this cover is not waterproof)

* Not available on the C40M ** Hard Surface Brush cassette coming soon
